

IRRESISTIBLE OFFER

GOH CONSULTING

Why create an irresistible offer?

It is the single biggest lever you can pull to generate more profit for your business

A great offer makes you a category of one so prospects compare you to “nothing” instead of competitor

Look at different offers that exist and make yourself a category of one

- Position your offer in such a unique way that they can't compare you to others
 - Never constrained by price; it's a value based offer

Master your offer → Sales and persuasion becomes easy

How do you create one?

There are 4 variables to consider when establishing an irresistible offer

1. Extreme pain
2. Purchasing power
3. Easy to target
4. Growing market

Riches in the niches: Same product 100x the price

- I help people achieve their dream physique (\$20)
- I help skinny people bulk up and put on muscle (\$500)
- I help busy businessmen be more energised and lose weight without spending more than 1 hour in the gym (\$2000)

The goal of great writing is for the reader to understand

The goal of great copy is for the prospect to feel understood

- If you can articulate their problems better, you can provide the solutions to their problems better

The bigger the pain the prospect experiences, the more money he will pay upfront

Core offer components

1. Identify dream outcome

I help **specific outcome** in **time period** without **biggest pain/fear**

Ex. I help business owners/coaches hit \$50k-100k/mo in 60 days without having to spend all day doing outreach and posting reels

2. List out all perceived problems

What perceived problems would the client have about your offer?

- Write them down and answer all of them

Ex. Hire bad sales reps

- *Have a huge pipeline because of my training and been in sales for over 2 years*

Use this template to help you really craft an amazing offer

[Template](#) | [My Example](#)

3. List out 5 of the main deliverables your core offer provides

The key here is to position your deliverables as solutions that will benefit the client

Example:

- **DFY Systems and Processes:** Track every single one of your leads so you don't lose out on any sales, save time by having DFY SOPs, centralized system to scale up
 - We build out your entire Sales CRM (GHL), Notion Sales Scripts, Discord Channel Automations, etc
- **Offer Blueprint:** Charge \$5-10k upfront for your offer and create an offer that's a category of one. No more price comparisons and objections
 - How to build a completely irresistible high ticket offer by giving you our exact offer blueprint and nonstop consulting

4. What would I deliver if my product costs 10x its current amount?

Ex. Run ads for them, train setters 1-1, hire a VA, set up zapier, inhouse editor, automations, systems, etc

Choose a few that you will implement into your own program

5. What would I deliver if my product costs 1/10th its current cost and had to provide more value than I currently am at my current price?

Ex. Crazy group training, valuable video modules, record looms for bottlenecks, tons of role plays, accountability check ins, etc

Implement every single thing that you listed down here
