I tried:

- Talking head videos
- Miro board videos
- Vlogs
- Raw talks
- Scripted videos
- VSL-style video
- Broad angle
- Niche angle

Landed on two:

- Miro value videos
- Vlogs

Miro value:

- Great at talking

Vlogs:

- Natural yapper, can talk all day
- Entertaining, people like my personality

Find and leverage a format to emphasize why people should buy into you

Reverse engineer why your clients bought from you

4) Onboarding Form: <https://form.typeform.com/to/LhaammKH>

Duplicate this and send it to your clients

-

Find the 3 most common patterns people choose you and spend 30 mins brainstorming and reverse engineering it

Example: Asian

- Thinks im naturally smarter
 - Miro board video going more in depth on breaking down my strategy
 - Show more systems and processes i use in my business that they are missing
 - Use more stats and data to back up my points
- Morals and values
 - “You don’t show the flashy lifestyle and drive a lambo like all the online gurus I see. You’re more down to earth and genuine”
 - Me giving back to my family
 - Me helping my family
 - Me talking to my family

Look at your competitors and see what format/ style of content they’re ripping

- Will that type of format help you emphasize the common patterns of why your clients chose you?

5) Hop on a call with your top 3 clients

- Review content together
